CO₂ Surgical laser system

Cod. **ES-CL30**

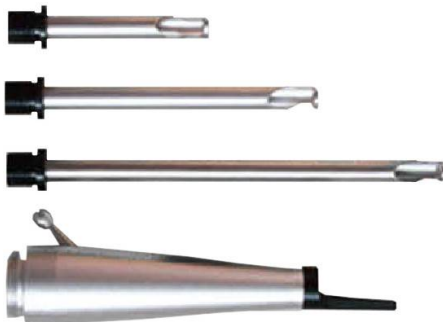

- Sealed-off laser technology
- Cw. pulse and ultra pulse operation modes
- Touch switch, microprocessor message display
- 7-joint spring-balance articulated arm
- 635nm diode laser pilot beam
- Safety protecting or with automatic alarm
- Control panel:

ES-CL30 CO₂ Surgical laser System is equipped with a reasonable construction, stable performances, safety and reliability. The CO₂ surgical laser therapy apparatus is suitable for different departments as dermatological, ENT, gynaecological and general surgical for cut, cautery and vaporization treatment. This machine is used by different levels of hospitals and medical centers.

ES-CL30 CO₂ Surgical Laser has got an ultra pulse function: the laser can reduce hot damage around the target organ and the output time is extremely short (1 ms). This device has a blowing function which around the target organ can be cooled at pulse interval time. Adjustable interval time of ultra pulse that controls the depth of laser act.

ES-CL30 CO₂ Laser Surgical System is also suitable for pixel beauty treatment, such as removal pigment, wrinkle, blain imprint and rejuvenation.

Standard enclosure head pieces

F=100 mm head x1
Lengthening head x3
Pixel head x1

Optional head for operation
