# ESS-VIC XL

## Monopolar/Bipolar Electrosurgical Generator

### ESS-VIC XL - Electro Surgical Generator

Device with Instant Tissue response technology and Tissue impedance measurement systems. This model offers top of the line features like 20 program modes, multiple blend modes, endo cut facility, best monopolar cutting and coagulation performance with precision controlled bipolar output and host of safety features.

### Performance Features :

- 20 programs :**  
 ESS-VIC XL is a high performance micro controller based model with 20 programs with host of features and modes for all around superior capabilities.
- Real Time Tissue Response Technology :**  
 The real Time Tissue Response Technology provides surgeons with superior performance at lower power settings, minimizing the risk of tissue damage and neuromuscular stimulation.
- Patient Plate Return Electrode Monitoring systems :**  
 Patient Plate Return Electrode Monitoring System provides instant indication of the quality of contact of the patient plate return electrode. Failure or poor contact results in fault indication with sound alarm which substantially reduces the risk of burns under the patient return electrode.
- High power efficiency of 97% :**  
 The power efficiency of the generator leads to multiple benefits like increased reliability, most compact size, high portability, economy and reduced power consumption.

**Technical Specifications :**

	Max. Power (Watts)	Rated Load (Ohms)
