ESS-400

Monopolar/Bipolar Electrosurgical Generator

ESS-400 - Electro Surgical Generator

The device comes with Instant Tissue response technology and Tissue impedance measurement systems. These models offer top of the line features like multiple blend modes, endocut facility, best monopolar cutting and coagulation performance with precision controlled bipolar output and host of safety features.

Performance Features :

- **Micro controller based model**

ESS-400 is a micro controller based model with all the required features. Full power output at low cost. This is the right model for the customers who required basic 400W micro controller based model.

- **Real Time Tissue Response Technology:**

Real Time Tissue Response Technology provides surgeons with superior performance at lower power settings, minimizing the risk of tissue damage and neuromuscular stimulation.

- **Patient Plate Return Electrode Monitoring System:**

Patient Plate Return Electrode Monitoring System provides instant indication of the quality of contact of the patient plate return electrode. Failure or poor contact results in fault indication with sound alarm which substantially reduces the risk of burn under the patient return electrode

- **High Power Efficiency of 97%**

The power efficiency generators are the highest in it's class 97%. This leads to multiple benefits like increased reliability, most compact size, high portability, economy and reduced power consumption.
